

Action plan submitted by Gamze KAYA for Osmanpaşa Ortaokulu - 14.01.2023 @ 20:43:52

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

Data protection

- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of

new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

- › Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › It is good that staff members with questions about software issues can contact a school helpdesk. Consider whether you need to provide training and/or guidance to new software that is installed on school computers. This is important to ensure that school members will take advantage of new features, but also that they are aware of relevant security and data protection issues.

Policy

Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › This is good teaching practice, but you need to consolidate it with a section dedicated to mobile phone usage in your School Policy and your Acceptable Use Policy. Consult all stakeholders to develop this; the fact sheets on Using mobile phones at school (www.esafetymodel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetymodel.eu/group/community/school-policy) will provide helpful information.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetymodel.eu/group/community/acceptable-use-policy-aup.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you

anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

Staff policy

- › It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).
- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?

Pupil practice/behaviour School presence online

- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.

Practice

Management of eSafety

- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetylabel.eu/group/community/school-policy.
- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good that sexting has been integrated into wider online safety education across the school. Are you able to assess the impact of this education? Does it help pupils to modify their behaviours? How do you know?
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is good that you are making a specific reference to sexting within your child protection policy as this is a growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetymal.eu/group/community/pupils-use-of-online-technology-outside-school.

Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetymal.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetymal.eu/group/community/suggestions-for-online-training-courses.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the

Forum, and your reporting of incidents on the template provided are all also taken into account.
