## BAG- ARZU KÖRPEOĞLU'S STUDENTS

Korgeneral Enver Akoğlu Secondary School

### Features of the bags

- It can be adapted to the correct body size, posture and weight.
- It is weather proof that protects your gadgets from rain and snow.
- It is made from single use plastic bottles. Everything on the bag comes from recycled&renewable materials, including labels and zippers.
- Inks and dyes are free from harmful chemicals.

This place also has a wind or watertight door for the animals to enter and exit.

You can push it open and close. If you want, you can put pens or such things in it. It is also made of completely natural materials

In this part, there is a glass and a compartment made of natural waste, the inside is larger than the outside, so if you can carry your hamster or mini cat-style animals here, there will also be compartments for the animals to eat without dirtying the bag.

this part is a part that can only be opened with a fingerprint, and also an area where you can put your phone and charge it.

# MEHMET AZMAN ÇAVUS SECONDARY SCHOOL

## BLOUSE

DEMET KOÇOĞLU'S TEAM

*It will be made of environmentally waterproof fabric.*

*It will have cones on the shoulders to measure the body temperature.*

*It will have wings in which there are air bags.*

*It will have sensors on sleeves to measure the heart rate.*

*It will have three different colored buttons.  
The first one is for bluetooth.  
The second one is for WIFI.  
The third one is for GPS.*

## BOOTS: EMANUELA DE MARCO'S STUDENTS

### FEATURES

they have got a pair of metal wings that allows them to fly. They are colored with different shades of purple. The boots have a diamond on the top and a pocket.

### MATERIALS

Leather, plastic, metal wings

### COST

Future boots will be very expensive because of the materials used. Price will be 3000\$

## CAP/HAT-Fatma ÖZMEN ERSOY'S students

\*At first glance, it can be thought of as a stylish hat that can be used for special occasions.

\*The black velvet fabric and tulle detail on it is made of recyclable environmentally friendly material.

\*When the tulle detail and velvet fabric on it are removed, it turns into a summer hat.

\*The summer hat is made of an environmentally friendly, waterproof special straw.

\*It has the feature of measuring the temperature of the environment. When the temperature reaches 30 degrees, the vibrations inside the hat act and give cool air.

\*When the button on the hat is pressed, it gives light to its surroundings.

# Before

- a stylish invitation hat at first glance
- Velvet black fabric and tulle detail add a distinct elegance

# After

- a summer hat with the velvet fabric and tulle detail removed
- A special waterproof, environmentally friendly mat is used.
- measures the ambient temperature
- gives cool air

## GAMZE KAYA'S STUDENTS-DRESS

-By an app on the cellphone, the dress transforms into any dress you want.

-It will let you know when the heartbeat changes dramatically.

-We can teleport to a place we want with the button on the belt.

-The temperature of the dress can be adjusted according to the weather conditions by an app on the cellphone.

-It will show your location when you get lost.

-When we press the button of the dress it may light up. We can light our way.

-You will be able to change its height.

-The dress will be made of stain-resistant fabric.

Recycled and renewable materials, electronical receivers and transmitters will be used. LEDs connected to an app will help people to choose the colour of their dress.

FLIP FLOPS-*Inna Kim' s Team*

Made of re-used materials

waterproof

the net-screen function

can do foot-massage

can be turned on

the flying function

have the thermoregulatory function

the wheels can be on

may be adjusted to any size

## **GLOVES**

***Isabel Redondo Vigil' s Team  
IES Escultor Juan de Villanueva  
Pola de Siero, Spain***

The gloves of the future will look like ordinary gloves, but if a person calls you, you'll be able to talk with him/her by means of holograms. The gloves will be black, grey and white and in the center there will be a circle in another tone of grey.

The person's hologram will appear in this circle when you call him/her.

NECKLACE-*Katerina Didila 's Team*

# What will the Jean's look like in 2050 ?

Agrupamento de Escolas Dr. Alberto Iria

- The future Jean's will be made of durable polyester . 
- They will be super light weight. 
- They will dry very quickly. 
- They will be free movement 
- The jeans will allow to charge mobile phones through bluetooth. 
- Jeans will change colours 
- They will be anti-flamma 
- They will adapt to temperature. If its it's hot the Jean's will cool you down  
If its it's cold they will warm you up . 

Maggie Rizzuto 's students - ICS A.  
Gabelli- Misterbianco  
Class 3 A

It will have:

- an air bag
- scented plants
- automatic zips
- patches, studs, tears
- air conditioning
- headphones

## OUR SUSTAINABLE JUMPER

Its main characteristics:  
It's made of natural or recycled fabric of scented plants;  
It is fitted with an airbag which protects against shocks or falls;  
images expressing our emotions will appear in the centre;  
accessories will be automatic zips, studs, tears, patches, hot air conditioning and also spectacular headphones

# FUTURE FASHION RAIN COAT

Maria  
Grazia  
Monaco's  
Team

SEASON  
IT WILL CHANGE  
ACCORDING TO THE CLIMATE...

IT WILL COST MORE  
THAN NOW, BECAUSE THE  
TECHNOLOGY WILL BE  
MORE DEVELOPED...

COST

MATERIALS -> THEY WILL BE SUSTAINABLE USE  
PLASTIC AND RECYCLED MATERIALS...

# OUR RING

## FUNCTIONS

It will be **technological** and it will be connected to the Net; it will also have a **GPS** to find out where we are (blue button).

It will be a ring **designed for our well-being**; it will have 3 buttons with different functions.

It will change the colour according to our **blood pressure**: it will turn red to signal high blood pressure and blue for low one (green button).

It will also be **connected to the Red Cross in case of emergency** (red button). The ring will change colour and let you know if the **weather** is going to change colour (red = hot - blue = cold).

There will be a **microphone to communicate** when you are connected (black button).

## SHAPE AND COLOURS

The ring will be octagonal. In the centre the precious stone will change its colour intensity according to our mood and daylight. It will be surrounded by four rubies.

## MATERIAL

The ring is made of gold.  
The buttons are made of metal.

**ODOR-SENSITIVE SOCKS  
WEAR & GO**

**\* They will:**

- have a special textile
- change colors in different weather conditions
- have an air-refresher button
- have air cushion pad at the bottom
- have an automatic pedometer

**\* Main Characteristics and Functions:**

**Functions:**

- They are made of a special kind of cotton wool.

- They have different color combinations.

Color will change themselves with air-refresher button.

- The air cushion pads will make walking and running easier for people.

- A pedometer on our socks will count your steps & measure your heart beats.

TSHIRT/SHIRT-*Nino Chkhetia' s Team*

## SNEAKERS/SHOES- *SERHAN ARI' S TEAM*

- \* *It tells you the time*
- \* *It shows about your personal information.*
- \* *It identifies your needs.*
- \* *It charges the battery using solar energy.*
- \* *It measures your body temperature and air temperature*
- \* *It changes colour according to the environment.*
- \* *It shows your hunger rate.*
- \* *It shows risk of getting sick.*
- \* *Artificial Intelligence is used. It motivates you by talking to you.*
- \* *It helps you to fly.*
- \* *It also counts your steps.*
- \* *When you are cold, the heating is activated when you press the button on it.*

# OUR FUTURISTIC SKIRT

This skirt will also get into a chair

**Technology will influence the fashion industry in the future.**  
**The skirt we have in mind is made of non-polluting materials, of a currently unknown material with isometric design.**  
**It will be bulletproof and it will have a voice assistant.**  
**In winter it will heat itself and in summer it will refresh. It will also smell very good.**  
**Skirts will change their colours creating new effects, according to body temperature.**  
**This skirt has also got an incorporated screen and an MP4.**

Rita Filippetti's sts-O. Nucula School-Italy

Class 2I

# OUR PIONEERING SKIRT

Fashion in the future will be created by stylists robots.

The future skirt will have:  
- storage pockets to charge the phone;  
- a magic button with which you can lengthen it;  
- a button that makes wings grow behind the back to be able to fly where we want;  
- a voice command to transform it into a new dress of your choice.

This skirt will be cheap and useful.

It will have:- a belt with an incorporated logo and when it gets dirty you can simply have the stain removed by pressing the logo;  
- little cables that give you the power of telepathy.

It will be made:

- from electromagnetic and multi coloured fibers or from ecological material;  
- in LEDs so you can change colour and choose fluorescent shades.

Rita Filippetti's sts- Class 2M-O.Nucula-Italy

Shorts-***Oana Crihană's Team***

# A SWEATER IN MINECRAFT STYLE

Waldemar Cymes 's Team

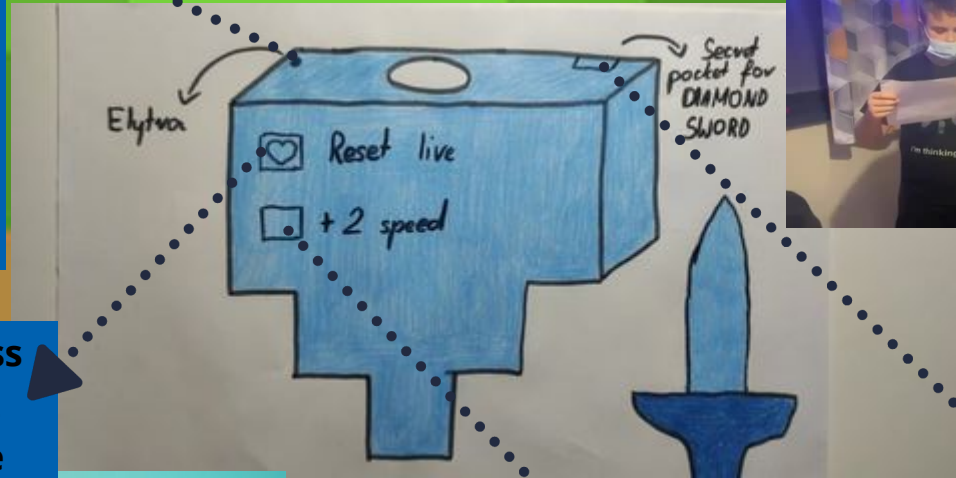

Popularity of Minecraft won't change ever!  
With technology of the future some ideas used in Minecraft will be possible to make in real live.

One of the features of this sweater is "Elytra". It will be one of the best items in sweater because it will make the sweater a flying machine.

When we will press the button „Reset live“ you will have basic medical care immediately.

"2 speed" will make speed double, when a sweater will be used as a flying machine

On the right side of the sweater there will be a sword pocket. It will be a very useful item.

## SUNGLASSES ~ Violeta Nazarska's students

☁️ We bought sunglasses, then we plugged in the glue gun and glued the can tabs onto the frame. We decorated them with colourful tassels. We also glued some purple crystal stickers onto the frames.

☁️ The meaning behind our idea was that we, the gen z, always drink energy drinks and we keep the taps for ourselves. Something else we have to mention, is that the taps we used are for hugs. If you give them to someone, it means that they are obligated to give you a hug.

*Tie-Yonka Dyulgerova' s Team*

**YUSUF DELIER'S STUDENTS  
NAMIK KEMAL SECONDARY SCHOOL**

**TROUSERS**

**FEATURES**

- It will let you choose different modes.
- There will be bluetooth, stepcounter and calculator.
- It will have GPS to tell you the way to follow.
- The USB slot will let you get some other trousers' features.
- The ulse counter will help you to stay safe.
- Security alert will inform the police you if you have a problem.
- There will have a WIFI button.
- It will have bluetooth.

## UMBRELLA- Zehra Şentürk's Students

★ **Materials**  
backpack  
umbrella  
plastic pipe  
bottle  
tape  
glue  
funnel

We thought about how umbrellas would be in the future and we brainstormed. Since there will be a water problem in the future, we decided on a design where we can save rain water.

First of all, the shape of the umbrella will be designed wider and unusual way. Since the umbrella is fixed in the bag, we don't need to hold it and our arm will not get tired.

These waters can be used in various fields.

The amount of water to be saved can be increased by placing the larger of these umbrellas on the roofs of the houses.

## **VEST**

**ZUHAL HANDE KAYABEY'S STUDENTS**

**MEHMET AZMAN ÇAYUS SECONDARY SCHOOL**

**It is a vest made entirely of eco-friendly materials**

**It will have a small screen showing our body temperature**

**It will have a fabric that will cool us when our body temperature rises and warm us when our body temperature decreases.**

**It will have color changing buttons and patterns. So it will match your every outfit.**

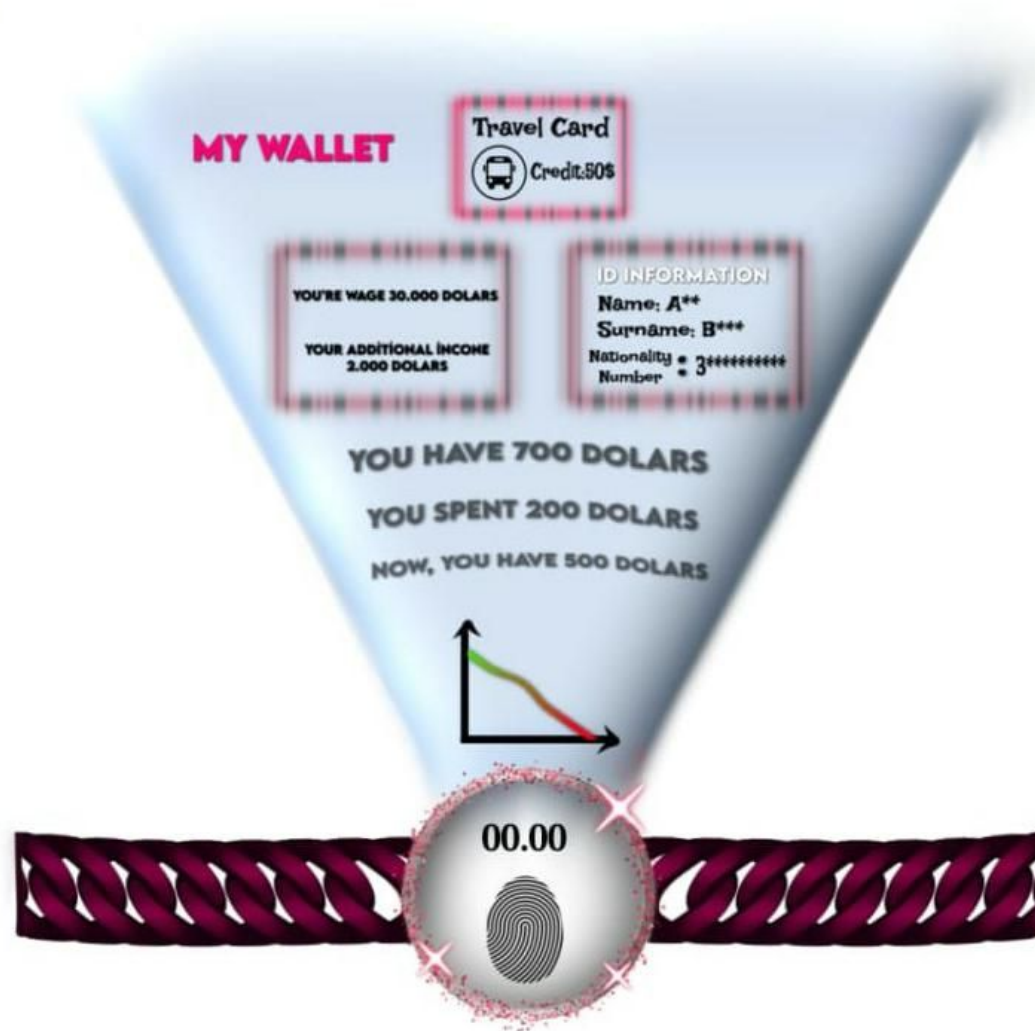

**There will be a massage mechanism on the back of the vest. When we press the button, the mechanism will start and the vest will start massaging us.**

**There will be a perfume reservoir inside the vest and when we press the button, our vest will smell perfume.**

**For all this technology, it will use solar energy, which is a renewable energy sources.**

# Wallet - Sedef Aktaş 's Students

\*The wallet of future will not be needed to be carried as an item in pockets or purses but be worn.  
\*It will be produced as smart watches which includes all the stuff you need to carry in your actual wallet.

\*It will support your identity information, or travel card account when you need to get on a public transportation.

\*Everything will be supported digitally.

\*It won't be able to be unlocked by anyone but you.

\*It will also show your last expenses and how much you have in your wallet account.

## Functions of the Wallet

\*unlock with fingerprint

\*three dimensional holographic imaging and sound system explaining what's in the wallet

\*contain your private data(ID card)

\*contain your travel card

\*the table of your last expenses (daily/weekly)

*Thank you all the contributors...*
